

Gitea at the SDCC

Status: 7 Organizations, 94 repositories, O(dozens) of commits a week from 20 active users in the last month

Features: issue tracker, wiki, pull requests, ACLs per-org, per-team, CI integration via webhooks

Many of these are not being used or only very sparingly

Is there a desire for more features? Is wider advertisement needed?

Gitlab: increasingly, migration will be costly for existing users (and admins), and will incur a licensing cost
