Christie, W.

Served as one of two U.S. representatives on the Large Hadron Collider, Resource Review Board (RRB, made up of funding agencies for the various countries involved in the LHC effort), Scrutiny Committee. Role was one of the two U.S. representatives on the committee, and I was the subcommittee Leader for the CMS review, and a member of the subcommittee for the review of ALICE. The purpose of this committee is to review and recommend to the RRB whether to approve the Operations budgets for the LHC experiments, as well as serve on the Cost review committees for the LHC detector upgrades.

Served on National Science Foundation Review committee to look at the full life-cycle cost implications of the high luminosity upgraded to the ATLAS and CMS detectors. This review includes some video meetings and paper reviews through September, and then the actual review on September 30th and October 1st. As I understand it this is a one-time review.
