

Just-in-Time EDM converter for Phoebus

Saturday, 5 October 2019 11:55 (20 minutes)

CS-Studio includes an EDM-to-BOY converter. It's being ported to the latest version of CS-Studio, Phoebus, where it turns into an EDM-to-DisplayBuilder converter. It can be used from the UI or in batch mode to convert a bunch of displays. In addition, it offers a new just-in-time mode where it can download EDM displays and convert them when the user first tries to access them.
