Summary of the first EPICS Documentathon

Saturday, 5 October 2019 09:30 (20 minutes)

The first ever EPICS Documentathon was held at ESS in September of this year. A group of 12 people worked on a number of topics to develop, update and improve the EPICS documentation. A new infrastructure for writing and publishing EPICS documentation was put in place. Also the epics-controls website navigation was restructured, to make it easier to use and to integrate with other documentation.
The talk will introduce the documentation toolkit and the workflow, and also summarize the results of the Documentathon.

Track

EPICS development

Primary author: KORHONEN, Timo (European Spallation Source ERIC)

Presenter: KORHONEN, Timo (European Spallation Source ERIC)

Session Classification: EPICS Developements
