

A User's Guide for EPICS Lua-Based Data Processing Subscription Update Filters

Saturday, 5 October 2019 10:05 (20 minutes)

Multiple previous talks described our embedding of the Lua interpreter in EPICS base for a replacement shell, for a Lua scripting record, and for dynamically filtering and re-configuring subscription update payloads within the Channel Access protocol.

This update talk will provide a end user's tutorial for these production system ready enhancements.
