

XXVIII International Workshop on Deep Inelastic Scattering and Related Subjects

Contribution ID: 104

Type: **Invited Talk**

Recent highlights on Higgs Physics from the LHC

Monday, 23 March 2020 11:15 (35 minutes)

Detailed measurements of the properties of the 125 GeV Higgs boson are fundamental for the understanding of the electroweak symmetry breaking mechanism. The LHC Run-2 dataset has made it possible to probe a wide range of Higgs boson properties in a variety of decay channels. This talk will summarize recent results from both the ATLAS and CMS experiments.
