

XXVIII International Workshop on Deep Inelastic Scattering and Related Subjects

Contribution ID: 182

Type: **Contributed Talk**

Recent results on exclusive photon-induced processes in ultra-peripheral heavy-ion collisions with the CMS experiment

In this talk, we will present recent results on ultra-peripheral heavy-ion collisions with the CMS detector. This will include measurements on vector meson photoproduction in ultra-peripheral pPb and PbPb collisions, as well as light-by-light scattering measurements, and new studies of exclusive processes in photon-induced interactions to study low- x QCD dynamics.
