## Impact of heavy-flavor DIS data on unpolarized PDFs

*Wednesday, 25 March 2020 15:06 (18 minutes)*

We analyze within the JAM framework the impact on unpolarized parton distributions of heavy-flavor production measurements in deep inelastic scattering. In particular, we investigate the recent combined results of inclusive and heavy-flavor production cross sections at HERA, which impose additional constraints on the gluon and the sea-quark distributions at low  $x$ .

**Primary authors:** ANDRES, Carlota (Jefferson Lab); ETHIER, Jacob; MELNITCHOUK, Wally (Jefferson Lab); SATO, nobuo (Jefferson Lab); ZHOU, Yiyu

**Presenter:** ANDRES, Carlota (Jefferson Lab)

**Session Classification:** Structure function and parton densities

**Track Classification:** Structure Functions and Parton Densities
