

Midwest Critical Mass 2014

Friday 7 March 2014 - Saturday 8 March 2014

University of Toledo

Scientific Programme

The purpose of this workshop is to discuss the physics of the quark gluon plasma and the related RHIC/LHC experiments in a setting that encourages discussion and participation by young scientists. The target audience is scientists working in the the midwest region of the US. There will be two main "tracks" for submissions:

Theory

This track of the program is centered around theoretical developments.

Experiment

This track of the program is centered around experimental developments.
