

BNLBox Policy Proposal

- Supported Physics programs
 - Default quota of 50 GB but can be increased up to 1 TB
 - Requests for increase to be processed similarly to standard disk storage requests via RT
 - Requests beyond 1 TB need to be discussed to insure resources are distributed equitably among programs
- CSI programs
 - Same 50 GB quota
 - Pending a review of charge-back model
- Access to archival tape access
 - Generally not available by default, but can be discussed on case-by-case basis for supported Physics programs
 - CSI has a defined charge-back model in force, based on LQCD model

BNLBox Statistics

- 100 actual users (as of 01/23)
 - Used 1.6 TB
 - Stored 2.6M files
- Need better monitoring
 - Understand usage
 - Requirement for CSI charge-back
