

Meeting in Temple: proposed agenda

In our first workshop in Temple we will set the floor for the working plan. The total time allocated for the PID parallel sessions is 3.5h

We propose the following agenda:

1. Introduction: discussion on the scope of the work and plan to accomplish it
2. A talk from the representative of each eRD14 technologies and activities (mRICH, dRICH, DIRC, TOF, Photodetectors, electronics)
3. New ideas for PID
4. Discussion on the working plan and deliverables for the workshop in Pavia

For points 2. and 3. in each talk the assumptions and the critical points about the current development should be stated clearly.

The time allocated to each talk will be defined later depending on how many presentations we will have in total.
