

The Need to Extend the Studies of N^* Structure

Studies of N^* -electrocouplings over a broad range of photon virtuality Q^2 offer unique information on the non-perturbative strong interaction that determines the structure of different excited nucleons.

Insight on N^* structure from the CLAS@JLAB data on exclusive meson electroproduction (Review papers: I.G. Aznauryan & V.D. Burkert, *Progr. Part. Nucl. Phys.* 67 (2012) 1; I.G. Aznauryan et al., *Int. J. Mod. Phys. E22* (2013) 1330015).

Consistent results on N^* -electrocouplings from independent analyses of different meson electroproduction channels suggest reliable extraction of these fundamental quantities.

Complex interplay between internal core of three dressed quarks and external meson-baryon cloud in the structure of N^* states is strongly dependent on the resonance quantum numbers.

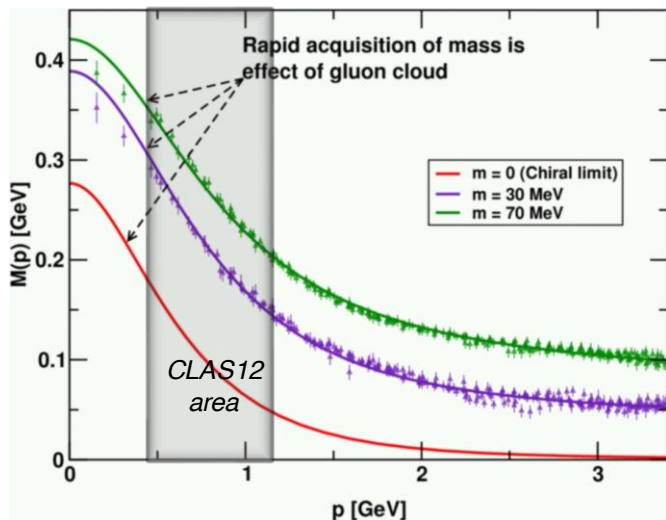

- Growth of relative quark core contribution with Q^2 in gradual transition to almost unexplored domain of quark core dominance at $Q^2 > 5.0 \text{ GeV}^2$.

N* Structure at High Photon Virtualities in Exploration of Strong Interaction

CLAS12 is the only facility foreseen in the world capable of determining electrocouplings of all prominent N* at $5 < Q^2 < 12 \text{ GeV}^2$. For the first time, almost direct access to the quark core at the distances where the transition from quark-gluon confinement to perturbative QCD regime is expected.

Dressed quark mass function

$\Delta(1232)3/2^+$ Jones-Scadron convention

J. Segovia et al., *arXiv:1408,2919 [nucl-th]*.

N(1440)1/2+

D.J. Wilson et al., *Phys. Rev C85 (2012) 045205 DSEQCD*.

I.G. Aznauryan & V.D. Burkert, *Phys. Rev. C85 (2012) 055202 LF QM*.

Consistent results on quark mass function from electrocouplings of different resonances at $Q^2 > 5 \text{ GeV}^2$:

- will prove relevance and reliable access to this fundamental ingredient;
- **address two of the most challenging problems in the Standard Model: the emergence of the dominant part of hadron masses and quark-gluon confinement.**

DSEQCD : constant quark mass.
(quark core only) ——— running quark mass.
Light Front ——— running quark mass
Quark Model from DSEQCD.
(quark core & MBcloud)

Studies of Nucleon Resonance Structure from the exclusive meson electroproduction experiments with CLAS12@JLAB offer an important contribution to the Long Range Plan.
