## Exotic Spectroscopy @ EIC studies from JPAC

*Friday, 29 January 2021 12:40 (5 minutes)*

The EIC provides exciting new possibilities to study heavy exotic candidates in photoproduction. Here I provide a summary of current JPAC work to provide estimates of production rates of key exotic candidates such as the  $X(3872)$  and  $Y(4260)$  at EIC kinematics.
