

# XXVIII International Workshop on Deep-Inelastic Scattering and Related Subjects

Contribution ID: 672

Type: **Contributed Talk**

## Prospects for Higgs and di-Higgs measurements at the ATLAS experiment

*Thursday, 15 April 2021 09:08 (18 minutes)*

The large dataset of about  $3 \text{ ab}^{-1}$  that will be collected at the High Luminosity LHC (HL-LHC) will be used to measure Higgs boson processes in detail. Studies based on current analyses have been carried out to understand the expected precision and limitations of these measurements. The large dataset will also allow for better sensitivity to di-Higgs processes and the Higgs boson self coupling. This talk will present the prospects for Higgs and di-Higgs results at the HL-LHC.
