

XXVIII International Workshop on Deep-Inelastic Scattering and Related Subjects

Contribution ID: 553

Type: **Contributed Talk**

Studies of b-hadrons and quarkonia at LHCb

Wednesday, 14 April 2021 12:51 (18 minutes)

Measurements of the properties of b-hadrons and quarkonia can help deepen our understanding of strong interaction. The large b- and c-hadron yields at LHCb and excellent performance of the LHCb detector make it an ideal laboratory for such studies. This talk presents the recent experimental studies on production, decay and spectroscopy of conventional b-hadrons and quarkonia at LHCb.
