

# XXVIII International Workshop on Deep-Inelastic Scattering and Related Subjects

Contribution ID: 374

Type: **Contributed Talk**

## Jet-based TMD measurements with H1 data

*Thursday, 15 April 2021 12:15 (20 minutes)*

Recently, jet measurements in DIS events close to Born kinematics have been proposed as a new probe to study transverse-momentum-dependent (TMD) PDFs, TMD fragmentation functions, and TMD evolution. We report measurements of lepton-jet momentum imbalance and hadron-in-jet correlations in high- $Q^2$  DIS events collected with the H1 detector at HERA. The jets are reconstructed with the  $k_T$  algorithm in the laboratory frame. These are two examples of a new type of TMD studies in DIS, which will serve as pathfinder for the Electron-Ion Collider program.
